

DID YOU KNOW?

1. 70% of claims sent to Medicare for diabetic supplies are denied. 25% of prescribers' orders are incomplete. Many of our accredited providers tell us by being accredited they follow better business practices that minimize the risk of lost reimbursements.
2. Some state Medicaid programs require accreditation to service DME patients.
3. Accreditation opens doors to future business with private companies that require accreditation:
 - insurance plans such as Anthem BC/BS, Carefirst, and PA SelectBlue.
 - many Long Term Care facilities
 - many hospice programs
 - other customers and suppliers
4. In this uncertain time when Healthcare reform could be rescinded, CMS could once again require accreditation - with NO EXEMPTIONS - to bill Medicare for DME.

Give NASI a call.

**Your NASI Accreditation Specialist will make
reaccreditation a breeze!**
