

Help Us Help You: Tell Us How DIR Is Impacting You

The Centers for Medicare and Medicaid Services is seeking public comment by Jan. 16, 2018 on a proposal that would require all pharmacy DIR to be reflected at point of sale. NCPA will encourage CMS to formally adopt this proposal, but we would like your input on how retroactive DIR is impacting you, your pharmacy, and your patients. Your input will help guide and strengthen our comments.

Please take a few moments and complete this [survey](#), which will arm us with necessary facts and figures regarding lag times in assessing DIR, real world examples, and impacts DIR has on independent pharmacies and the patients who rely on you.

This data will be helpful as we encourage CMS to move forward with requirements that pharmacy DIR be reflected at point of sale and as we continue our work with legislators on NCPA members' top legislative priority.

We appreciate your feedback!
