|  |   |  |                        |                             | PPE Chart Last Revised: May 2019  |  |

\* Avoid cutting or crushing tablets and opening capsules, whenever possible. Use pill crushers with handles and associated pouches that will contain medications to avoid cross-contamination. If liquid formulation is needed, contact the pharmacy.  
 \*\* Eye/face shields to be worn when there is risk of emesis or liquid could splash (e.g., working above eye level, cleaning spills, surgery bladder treatments, aerosol treatments, disposal of contaminated body fluids). Goggles to be worn with face shields when full eye and face protection is needed.  
 \*\*\*N-95 Respiratory Mask to be worn when there is risk of splashes, droplets, sprays, or airborne particles (e.g., irrigation solutions, aerosol treatments).
