COVID-19 OTC Test Kit Claims Processing

01.14.2022

Beginning January 15, 2022, providers may submit claims to Express Scripts for over-the-counter (OTC) COVID-19 test kits dispensed to Members without requiring a prescription. In order to submit claims, the OTC tests must have a published NDC and should be billed using Pharmacy NPI (Type 2) and Qualifier "01" as the prescriber ID.

Claims for COVID-19 test kits will include a \$0 Member cost share. No more than eight (8) tests per 30 day period should be dispensed to a Member.

Express Scripts reserves the right to implement attestation requirements related to these OTC COVID-19 tests for Members or for Providers that require agreement that any tests purchased are either for the covered individual or their covered dependent, are not purchased to satisfy employment requirements, are not for resale, and that the cost of the test is not being covered by any source other than Sponsor.

If you need a member's specific prescription processing information or other help with a claim, please visit our Pharmacist Resource Center at <https://prc.express-scripts.com>.

Thank you,
